Colorado County Profiles 2008

Nonmetropolitan Counties Without a Hospital

These profiles were prepared by the Colorado Rural Health Center to provide an overview of the basic health services infrastructure and demographics in Colorado's fourteen non-metropolitan counties without a hospital.

Prepared by the

Colorado Rural Health Center

"Enhancing healthcare services in Colorado by providing information, education, linkages, tools, and energy toward addressing rural health issues."

Through our mission, the Colorado Rural Health Center works in collaboration with federal, state, and local partners to offer various services and resources to Colorado's rural healthcare providers, facilities, and communities. Established in 1991 as a 501(c) (3) not-for-profit organization, The Colorado Rural Health Center is the State Office of Rural Health in Colorado.

Every effort was made to provide accurate information. If services were missed or corrections or updates are needed, please let us know.

Underservice Designations

Designation	Area	Type	Date
Primary Care Health Professional Shortage Area (HPSA)	County-wide	Low Income	July 2007
Mental Health Professional Shortage Area	Midwestern	Geographic	Feb. 2008
Dental Health Professional Shortage Area	None		July 2007
Medically Underserved Area/Population (MUA/MUP)	County-wide	MUA	June 2007

Underservice designations (Health Professional Shortage Area - HPSA, Medically Underserved Area - MUA, etc.) can make an area eligible for certain federal programs and resources; different designation-types work for different programs and resources. Designations can be county-wide, or they can cover a service area within a county. The HPSA designations have to be renewed every 3 or 4 years, while the MUA/MUPs do not (at least currently). While these are federal designations, the Primary Care Office in the Colorado Department of Public Health and Environment, (303) 692-2470, can provide additional information and assist communities with the process. To find out more about Health Professional Shortage Areas, please visit <http://hpsafind.hrsa.gov>. For information on MUAs and MUPs, please visit <http://bphc.hrsa.gov/databases.htm>.

It is extremely difficult to get good estimates of uninsurance rates at the county level. These county estimates use two 'proxies' to estimate levels of uninsurance. The first uses unemployment rates and population estimates, then applies a recognized formula to determine an estimate.

The second method uses data from the Current Population Survey (CPS) administered by the Bureau of Census for each county, along with studies showing the relationship of these variables to estimate uninsurance rates. See the CCMU website for additional details.

The third estimate on uninsurance shows uninsurance rates from the U.S. Census Bureau Small Area Health Insurance Estimates program available at <http://www.census.gov/hhes/www/sahie/index.html>.

Rates are deaths per 100,000 population. Age-adjusted rates provide a better basis for comparison among different geographical areas or time periods. Crude death rates are calculated without age-adjustment. Age-adjusted rates are adjusted to the 2000 U.S. standard population using the direct method applied to 10-year age groups.
